SMALL TREES FOR NURSERY PLANTING AND WHERE IMMEDIATE EFFECTS ARE NOT NECESSARY.

PLANT YOUNG TREES IN QUANTITY NOW FOR FUTURE PERMANENT PLANTING.—An investment of this kind will save you the cost of larger trees when required later.

The purchasing of young trees for planting in Nursery Rows is being adopted by the leading Parks, Public Institutions, Cemeteries, Shade Tree Commissions and the best private estates. It is economical and advantageous, as the trees are practically doubling in value each year and the expense in freight and cartage over long distances of the larger trees is obviated.

With rows 4 to 6 feet apart, from 4,000 to 6,000 of these trees can be advantageously planted per acre.

ALL TRANSPLANTED, WELL ROOTED STOCK.

QUALITY OF MATERIAL

The following should give you confidence in our stock. They all refer to stock shipped Spring 1915, and were received entirely without solicitation—a few only of the many similar commendations in our files.

"We hereby acknowledge the receipt of the trees ordered from you a short time ago. We are highly pleased with the trees. They are as fine as any we have ever seen."

"The Lombardy Poplars arrived yesterday in good shape. Trees satisfactory in every way—fine even lot."

"The fruit trees and the Cedrus Deodora have arrived in perfect condition."

"Both the Maples and the Hemlocks sent are very satisfactory in regard to quality and appearance."

"I take pleasure in saying that the plants which you sent me arrived in good condition and are much the best plants that I have ever received."

"In sending you this remittance, I want to take this opportunity to say that the Concolors arrived in very good condition, and apparently so did the Japanese and Red Pine."
